

# SMART HOMES: SMARTER INTERIORS

Green Ply, a cherished name in the flooring industry is helping the modern day architects & designers to create smarter homes & interiors with Green Floormax Wood Veneer Floorings.

Floorings are a very integral part of the modern homes and are known to contribute much more than being a mere utility space. An essential quantum in the mechanics of space décor, it accentuates the personality of a space, establishes its poetics and interacts with the supple psychology of its inhabitants.

Green Floormax Wood Veneer Floorings is now giving the architects and designers an added advantage in designing modern day homes and its interiors which will not only transform the aura of living environments but will also give an essence of living in luxury hotel for its inhabitants.

Green Floormax Wood Veneer Floorings comes with a high-density fibre core – making it long lasting and durable. This core is layered with real wood to give a warm and natural finish.

## Smarter Interiors with Green Floormax Wood Veneer Floorings

An increased number of architects & interior designers are looking at creating smart homes with smarter interiors to meet the aspirations of the modern day home owners. Home owners are also looking at changing the look and feel of interiors of their homes- from paints, furniture, furnishings as well as gadgets and electronic equipments. There is also a great demand to change the floorings of their homes.

Earlier the change in floorings was considered a tedious and time consuming process. Green Floormax Wood Veneer Floorings have solved this problem as they can be installed over the current floor in matter of hours.

### Product Details

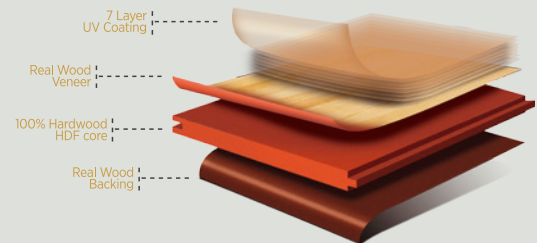

Green Floormax Wood Veneer Flooring is made with the finest components with each piece carefully handled to fabricate the perfect flooring providing one with form and functionality.

**Coating-** It has special UV cured lacquer developed aids to protect the wood veneer layer from wearing, scratches and strains. This special formula help to preserve the woods natural impression while maintaining superior durability.

**Wood Veneer-** It is made from finest sliced lumber to protect the natural texture and colors of the wood.

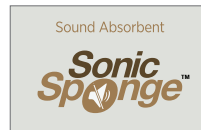

**Core-** Super compact HDF based core made from hard-wood fibers helps manage both impact and humidity variations to its best.

**Backing-** Real wood- backing layer to balance in case of temperature and humidity variations.

### Highlights of Green Floormax Wood Veneer Floorings

Green Floormax Wood Veneer Floorings are environment friendly as they consist of a 0.6 mm thin wood veneer which produces 5 times more natural wood flooring compared to parquet floor. They also can be easily installed as they are equipped with unique PERMA CLICK™ systems which are developed by Flooring Industries, Luxemburg. They also help in noise reduction due to dense HDF and are scratch, crack and impact resistant.

Green Floormax Wood Veneer Floorings are inspired by nature and they always give the warmth and beauty of natural wood undergoing natural treatment to retain their natural grain, colour and texture. ■
